A digital platform built to convert interest into action

Admissions · Free resources · Physical books · Library · Promotions · Analytics

Five-week launch proposal

Prepared for Impact Career Tutorials

One connected journey, not a collection of pages

The website should help a student decide, act, and receive a timely response while giving staff control of daily operations.

01

Discover

Search-friendly course pages, verified proof, faculty, resources and clear programme comparisons.

02

Take action

Enquire, unlock a resource, buy a physical book, apply for the library, or continue on WhatsApp.

03

Follow through

Staff receive structured leads, orders and applications with status, ownership, follow-up and reporting.

EXPERIENCE QUALITY

Designed deliberately for every important screen

Phones, iPads and other tablets, laptops, and large displays receive equal design and testing attention.

Mobile **iPad / tablet** **Laptop / desktop**

Touch-friendly admin · readable forms · no horizontal overflow · fast on weaker connections · keyboard accessible

LAUNCH SCOPE

Six modules working as one platform

Each module has a public experience, a staff workflow, and measurable outcomes.

01

Courses & enquiries

Programme clarity, CTAs, one lead history and staff follow-up.

02

Free resources

Search, gated access, consent and fast PDF delivery.

03

Physical books

Catalogue, cart, Razorpay, stock, orders and Resend email updates.

04

Library

Plans, facilities, rules, application and staff review.

05

Promotions

Scheduled banners, inline campaigns, targeting and expiry.

06

Analytics & SEO

Conversion funnels, Search Console and crawlable content.

A small admin built around the work people actually do

No heavyweight CRM. Staff see what needs attention and complete the next action quickly.

TODAY

New or updated leads	12	Assign and contact
Follow-ups due	5	Call or WhatsApp
Paid orders	4	Pack and dispatch
Library applications	7	Review details

A

One lead history

Repeat submissions update the same person while preserving every enquiry.

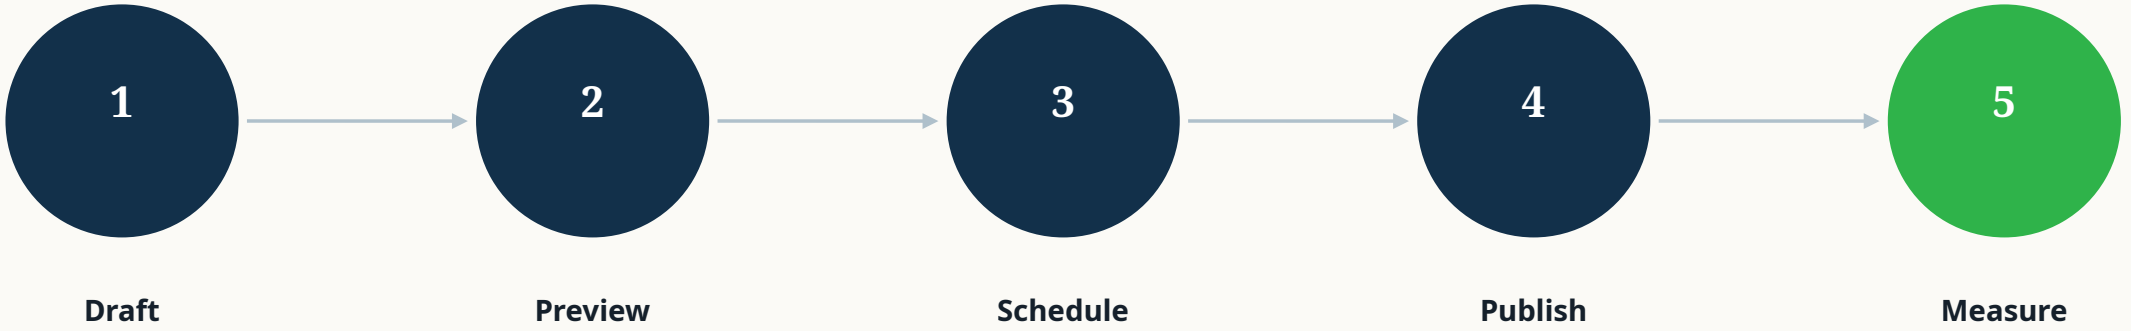

B

Visible exceptions

Payment mismatch, overdue follow-up and failed actions are surfaced.

Campaign control without asking a developer

Staff can plan a course launch or book offer, target the right pages, and measure the result.

Announcement bar

Inline campaign card

One restrained modal

No stacked popups, false scarcity or distracting auto-rotation

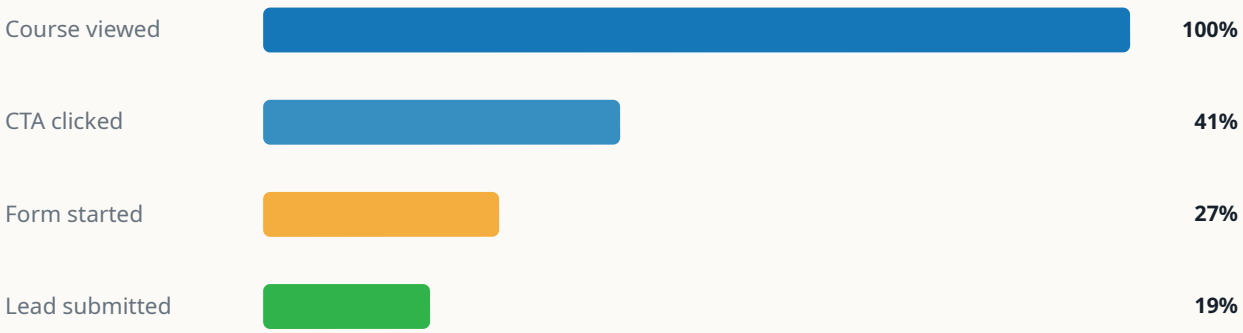

MEASUREMENT

A business dashboard the owner can understand

PostHog shows where interest comes from, what people do next, and where they abandon. Personal lead details stay in the admin.

1,842	126	42	18
Visitors	Qualified actions	WhatsApp handoffs	Paid orders

Course enquiry funnel

Illustrative dashboard — final figures come from live usage

What this answers

- Which course pages create enquiries?
- Which promotion creates orders?
- Where does checkout lose people?
- Which channels create real action?

Build evidence and improve local discovery over time

The launch creates a strong technical foundation. Ongoing local growth is measured separately and cannot honestly guarantee a fixed rank.

01

At launch

Crawlable course and book pages
Unique metadata and structured data
Sitemap and Search Console
Consistent business details

02

Ongoing

Business Profile posts and photos
Genuine review workflow
Local content and citations
Monthly query and conversion review

03

Measured by

Search impressions and clicks
Profile calls and directions
Enquiries by landing page
Qualified actions, not vanity traffic

DELIVERY

Five weeks, with clear review points

The schedule begins after the advance, approved starting content, and required account access are received.

01

Direction

Requirements freeze, content audit, main journeys and visual approval.

02

Public platform

Courses, enquiries, resources and responsive system.

03

Commerce

Books, cart, checkout and library applications.

04

Operations

Admin, promotions, orders, leads and analytics.

05

Launch

SEO, content entry, testing, training and production release.

Client feedback requested within two business days at each approval point

A complete five-week launch

The scope includes design, implementation, operational workflows, analytics, deployment and staff handoff.

PROJECT INVESTMENT

₹37,500

50% to begin · 30% at working preview · 20% at production acceptance

Five-week target subject to timely content, approvals and provider verification.

01

Approve scope

Confirm inclusions, exclusions and content limits.

02

Share inputs

Provide content, accounts, policies and catalogue data.

03

Begin delivery

Advance payment reserves the five-week production window.

04

Review weekly

Short decisions keep scope and schedule controlled.

POSTHOG REFERENCE

Useful official examples to open during the meeting

These explain the exact capabilities. The ICT dashboard will be simpler and tailored to admissions, resources, books and promotions.

Product analytics

Events, trends and meaningful actions

Funnels

See each conversion step and where people abandon

Dashboards

Keep recurring metrics in one owner view

Session replay

Watch privacy-masked journeys to find UX problems

Web analytics

Traffic sources, pages, devices and referrers

Pricing

Current free allowances and usage pricing

Tip: open Funnels and Session Replay before the meeting and keep them in browser tabs.
